

We founded Create IT in 2001 with a guiding principle: to develop projects that anticipate the future and represent an effective added value to the business of our customers. Maintaining a strong and mutually rewarding relationship, we combine best practices experience and technologies promoting an environment where talent can thrive, achieving the best in people.

PEOPLE TO PEOPLE

At Create IT we think of customers as people and not as organizations. Each of us is constantly pushing the boundaries to provide the best solutions which facilitate, simplify and optimize their daily activity. An approach focused on outcomes, on quality deliverables and innovation.

PASSION FOR WHAT WE DO

When we believe in the value of our work, when we see the satisfaction of the people around us and when we see the before versus after, we conclude that there is a real passion that moves and motivates us to do more and better. We are a team fully focused on success.

WHY CREATE IT?

BECAUSE WE ARE ONLY ONE TEAM: CREATE IT AND CUSTOMER

We do our best for the company as we are part of a common project focused on results and problem solving. Our goal is total satisfaction and high adoption-rate and this is only possible if truly working together!

BECAUSE WE CONTINUOUSLY VALUE OUR TEAM

To be one step ahead all the time and offer tomorrow's solutions today, we invest in training, in sharing knowledge and promoting a work environment where everyone feels a vital part of our success.

BECAUSE WE ARE A MICROSOFT PARTNER OF EXCELLENCE

Projects with Microsoft technology? That's us! Create IT, Microsoft Gold Partner, has a close relationship with Microsoft since its foundation in 2001. Over the years we have been strengthening the commitment, the skills and the value we add to solutions.

BECAUSE WE PARTICIPATE IN EVENTS OF REFERENCE AND WE LEAD

As speakers, exhibitors or participants, we are a constant presence in key technology events in Portugal and worldwide. That's the only way we can keep pace with technological developments, anticipate what is coming and keep up with trends.

WHAT WE DO

 E-Commerce	 Search Driven Applications	 Portals	 Custom Solutions
 Collaborative Solutions	 Integrated E-Business Solutions	 Enterprise Content and Document Management	 Enterprise Integration
 Mobile & Multiscreen Solutions	 User Interface & Usability	 Search Engine Optimization	

smartportals smartportals.pt **One platform for portals, integrated, dynamic, agile.** **Systems Integrator. Services & Solutions.** Microsoft Cloud Solution Provider program

SOME PROJECTS THAT MAKE HISTORY!

ASCENDUM INTRANET

Portal focused on approaching and increasing collaboration between teams, knowledge sharing and how subsidiaries of 18 geographies communicate with each other, through the Office 365 tools where Yammer has an important role.

PESTANA E-COMMERCE

Cloud-based solution (Azure) and SharePoint-based backoffice which collects information from all hotels (more than 80 units and 9,000 beds), with focus on cross-selling and integration with business support systems.

LUZ SAÚDE CUSTOMER PORTAL

MultiscreenWeb Client portal integrated with the services and infrastructure of Luz Saúde. Customers can access their profile, schedule appointments, access exam results and enquiries, anytime and anywhere.

CONTINENTE ONLINE STORES

Technology partner in the development of various online stores (School Books and Wells) integrated into the multi-store solution created for Continente.

BPI AGILE

Deployment of AGILE solution (exposure limits integrated management) which allows BPI to reduce operational risk, streamline business activity and produce standardized management information.

CIMAC SMARTPORTALS

Solution that groups portals of 14 municipalities of Central Alentejo, the CIMAC portal and the ADRAL portal, give a new impetus to the region: consolidates information, grants autonomy, streamlines processes and optimizes resources.

CONSULTANCY IN RECOMATICS

Consulting Services in the Belgian company based on the 'Vycunia Provisioning' solution, designed to perfect the information architecture in SharePoint and allow business users to perform an interactive setup with multiple restatements, refinements and prototyping.
